

PPM: Numerical Reasoning (N2) Test

Name: Sample Tester

Date: 11/19/11

Admin ID: UAT_jginsburg

Tester ID: sampletester

The PPM Numerical Reasoning test measures a subject's ability to reason with numbers. Each problem looks at a person's ability to see the relationship between sets of numbers. This test is a good predictor of academic performance and also a strong indicator of success in jobs requiring an understanding of numerical data.

The test taker had a raw score of 8 of a possible 25 points, and answered 25 of 25 questions.

The table below shows the percentile ranking for this score compared to three different comparison groups.

General Population	Working Population	Professional Manager
90%ile	80%ile	15%ile

* The results from this assessment should never be used in isolation to make selection decisions.
